## Risk and Reward Profile

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

### The following risks are considered material and may not be fully captured by the risk and reward indicator:

- The sub-fund invests in sufficiently liquid markets although, under stressed market conditions, it may only be able to sell assets at a discount.
- Equities in general are more volatile than bonds. Emerging market securities are generally more sensitive to economic and political instability, scarcity of public information, market volatility, and local regulations. Other factors include lower liquidity, higher default risk, restrictions on Investments or transfer of assets, and failed/delayed delivery of securities or payments to the sub-fund.
- The Sub-Fund may invest in assets which are priced in non-Euro currencies. Therefore, the value of your investment may fall if the Euro rises in value against those currencies.

A complete description of risks is set out in the Prospectus of the Fund.

## Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is a maximum figure. In some cases you might pay less.

The ongoing charges figure is based on expenses for the year ending 31 December 2020.
